## WHO WE ARE

---

Danver manufactures stainless steel cabinets designed for outdoor kitchens. For nearly 20 years, we have perfected the approach of bringing color, style and design from the indoors, out. We have established Danver as a leader in outdoor living by providing homeowners and designers with the ability to expand their outdoor spaces from a basic barbecue island to a fully functional outdoor entertainment space.

Danver Stainless Outdoor Kitchens cabinetry features dozens of styles available in hundreds of sizes, all made from durable and environmentally-friendly stainless steel, powder coated in a rich palette of finishes.

Our approach gives designers and architects of all disciplines the flexibility and freedom to design outdoor kitchens on rooftops, decks, transition rooms, backyards and anywhere people gather to enjoy outdoor entertaining.

## OUTDOOR LIVING

---

The popularity of outdoor living spaces has placed color, style, design and function at the forefront of the creative process, driving the focus of design professionals, architects and builders, as well as homeowners and tenants. From single-family homes to multi-family communities, as well as branded residential properties and commercial buildings, Denver Stainless Outdoor Kitchens delivers.

Whether designing with our traditional stainless steel cabinetry, proprietary PPS system - developed for multi-family common areas - or mobile food and beverage service carts - crafted to elevate hospitality and commercial environments - creating the perfect outdoor entertainment space has never been easier or more inspiring. Select from Denver's extensive line of cabinetry and door styles then pair with your choice of powder coat color or realistic wood grain to create a unique, signature look every time.

# HOW IT'S MADE

Outdoor living is about more than just personal style and atmosphere; it's also about function and longevity. Danver Stainless Outdoor Kitchens are designed and engineered for outdoor kitchens regardless of geography, climate or weather conditions.

With frameless, European styling, Danver cabinetry can be tailored to match any lifestyle or taste. In fact, each cabinet is built to order – ensuring the style, design and color match the project specifications and individual preferences.

- All doors, drawers and cabinet boxes are manufactured from 304-grade stainless steel; 316-grade is also available.
- Powder coat finishes carry a 7-year limited warranty and cabinets have a lifetime warranty against manufacturer defects.
- Drawers feature double-wall construction and full extension under-mount glides with self-close/soft-close technology.
- Cabinets fit any manufacturers' outdoor appliance including grills, smokers, side burners, sinks, bartending units and more.
- Each project is built to order with all fabrication, finishing, powder coating and assembly taking place at our Connecticut factory.
- Cabinets are delivered fully-assembled and engineered for easy installation.
- Cabinets are available in 3-inch increments ranging from 9 inches to 48 inches. Appliance-specific cabinetry sizes may differ.
- Each cabinet is a standard 30-inch height with 4 1/2 inch leveling legs, along with 27-inch standard depth; 24-inch depth is also available.
- Doors come standard with soft-close stainless steel hinges.

## WHAT MAKES DANVER UNIQUE

---

Our approach to outdoor kitchens is simply to bring the indoors outside. Everything you want and expect from your indoor kitchen can also be achieved with your outdoor kitchen.

- Cabinets with plenty of usable storage space
- Beautiful door styles that rival their indoor counterparts
- Soft-close cabinet doors
- Full-extension, undermount, soft-close/self-close drawers
- Extensive powder coat color palette
- Realistic wood grain powder coat finishes
- Functional cabinetry, such as trash pulls
- Hundreds of cabinet sizes and configurations to create seemingly endless layout & design options
- Cabinets designed to accommodate a wide variety of outdoor appliances

# DOOR STYLES

---

Danver Stainless Outdoor Kitchens puts style and function first. Our exclusive stainless steel door styles and drawer fronts provide strength and durability ensuring function and beauty are never compromised. Combined with our extensive powder coat colors and realistic wood grains, Danver delivers color, style and design to your outdoor space.

## HAMPTON

The Hampton is a solid slab door style that is made of vertical #4 brushed stainless steel. It is our standard door and drawer front.

## RIO

The Rio is a flat one piece, vertical #4 brushed stainless steel door frame that is prepped for a glass, wood grain or stainless steel panel insert (not included).

## KEY WEST

The Key West is a five piece stainless steel shaker-style door, featuring two 11/16" wide stiles and rails. The center panel can be plain stainless steel or powder coated with your choice of a color or wood grain finish from the Danver Stainless Outdoor Kitchens' palette.

## SEA GLASS

The Sea Glass door is a Key West door style with a frosted glass center panel representing the look of sea glass. It is available in three unique colors: Sky Blue, Seafoam Green and Cloud White.

## KEY WEST FROST

The Key West Frost features our classic Key West frame with a frosted glass center panel, available in your choice of colors from the Danver Stainless Outdoor Kitchens' palette.

## POWDER COAT FINISHES

---

Whether you want to blend with the landscape or continue an indoor theme to your outside kitchen, Denver Stainless Outdoor Kitchens offers a standard palette of 14 colors and 9 realistic wood grain powder coat finishes. While our standard color palette are the most popular colors, if you want a color that you don't see here, we may be able to special order it.

With the ability to customize the look and feel of the outdoor living area, Denver's powder coat finishes also provide a virtually maintenance-free finish by adhering directly to the stainless steel.

Danver's powder coat finishes protect your outdoor kitchen cabinets from harsh chemicals and weather elements such as salt from the ocean, rain and snow, heat and cold, even the desert sun! Every Denver Stainless Outdoor Kitchen is manufactured and painted in the United States, guaranteeing the quality, durability and longevity you expect.

# POST & PANEL SYSTEM

Although our traditional cabinetry is an excellent choice for outdoor amenity packages, architects and builders expressed the need for a more robust solution designed for multi-family common areas that meets specific needs including:

- Attractiveness and aesthetics
- No unnecessary storage space
- Extended workspaces
- Easily replaceable sections, in the event of damage

Our designers and engineers listened and developed the Post and Panel System – PPS.

Used as a stand-alone island or easily integrated with our traditional cabinet line, the PPS provides designers, architects and developers with seemingly unlimited options to choose from.

- 100% stainless steel construction for durability
- Powder coated finishes for aesthetics and protection from the elements
- Strength to support countertops
- Replaceable panels with the countertop in place
- No unnecessary storage space
- Shipped flat
- Easy installation
- Cost effectiveness
- ADA-compliant

## BEYOND THE CABINETS

---

As outdoor living has become more popular, individuals are keeping culinary skills and entertainment needs in mind when designing outdoor kitchens and living spaces - they want to add a degree of luxury to their backyards.

Danver Stainless Outdoor Kitchens are equipped to have the same upscale amenities that you find in an indoor kitchen - complete with durable, stylish cabinetry and the latest appliances and tools.

Danver's in-house design experts can help you customize your outdoor living space exactly as you want it - from cabinetry, countertops and appliances to drawer pulls and powder coat colors. Investing in the functionality and beauty of an outdoor entertainment space will add value and enjoyment to your home for years to come.

## BARBECUE HOODS

---

The ability to design an outdoor kitchen with the same flexibility as its indoor counterpart presents an occasional challenge - such as providing ventilation to remove cooking smoke and odors. To overcome this challenge, Denver Stainless Outdoor Kitchens offers grill hoods. These extra depth hoods are designed perfectly for lanais and the transitional "California" or "Florida" rooms with covered spaces, growing in popularity across the nation.

The 304-grade stainless steel hoods complement the rest of the kitchen, whether the cabinets are powder coated or stainless steel. They are available in 36", 42", 48", 54", 60", 66" and 72" widths. The 36" through 42" models feature fans with 1200 CFM; 54" - 72", 2300 CFM. With the optional muffler, the sound can be reduced, enhancing the comforts of outdoor living.

# DEKTON COUNTERTOPS

---

To complete your outdoor kitchen, you need a countertop that will withstand time and climate, but also have the right look and feel to complement the rest of the space. Denver Stainless Outdoor Kitchens can accommodate nearly any type of countertop you want, but not every countertop is built for the outdoors.

We recommend Dekton® by Cosentino for our kitchen countertops. While granite, concrete and soapstone are popular materials, it's important to use the correct material for outdoor applications. Dekton's® ultra-compact surfaces are designed for exterior use, offer UV resistance for color stability, have exceptional strength and high resistance to impacts, scratches and abrasion in high-traffic areas. Dekton® countertops are also non-porous so they require little maintenance. Their wide range of colors, paired with Denver's diverse color palette, provide an endless variety of styling options to fit your needs.

## COOKING APPLIANCES

---

One of the great features of Denver Stainless Outdoor Kitchens is that our cabinetry is designed to fit any cooking appliance. From your favorite grill or smoker to your pizza oven, your appliance can be incorporated into your new outdoor kitchen with ease.

During our 20 years of designing outdoor living spaces, we have experienced the need to fit all types of cooking appliances in outdoor kitchens. Our acquired knowledge allows our in-house design team to help guide you to the best options based on your specific cooking style and needs.

Although we do not manufacture grills and other cooking appliances, we distribute several quality brands at various price points for the convenience of our clients who are interested in buying from a one-stop shop. We can drop ship the cabinetry and appliances to the project site for easy installation.

## BAR/COOLING APPLIANCES

---

The convenience of having a refrigerator built into your outdoor kitchen is necessary for every homeowner. Danver Stainless Outdoor Kitchens offers a variety of models and brands, each one performing at different levels of effectiveness, based on the surrounding environment. Different styles, including two-drawer units, glass fronts, panels to match your Danver cabinets and more, are also available. Our in-house experts will help guide you in the right direction to fit your wants and needs.

Bartending systems are also among the most popular appliances wanted for outdoor kitchens. Whether you want to add a kegerator, a wine cooler or a complete bartending unit with a sink and faucet, we can help you decide what's best.

Although we do not manufacture bartending units, refrigerators, sinks, faucets or kegerators, we distribute several quality brands at various price points for clients that are interested in buying from a one-stop shop.

# DESIGN & INSTALLATION

---

Whether you are a homeowner or trade professional, Danver Stainless Outdoor Kitchens provides a variety of tools to help you design and define your perfect outdoor space. For the amateur we offer a Microsoft Word®-based layout program on our website, as well as libraries and files of our cabinets on 2020, SketchUp and other professional design and layout programs. Additionally, we can be found on online sites such as, ARCAT and CADdetails.

Danver Stainless Outdoor Kitchens are available globally through a network of dealers, designers, builders and other home improvement tradespeople. We do not sell directly to homeowners, as proper cabinet installation, along with electrical, gas and water connections, as well as countertop fabrication and placement typically require experienced trade professionals to ensure years of beauty and enjoyment.

To aid in professional installation, cabinets arrive on-site fully assembled ready to be installed. If the outdoor kitchen is standalone, it can typically be installed in a single day - unlike the more basic barbecue options that require masons and laborers on site for weeks at a time.

Complete instructions and all the parts and pieces for assembly are shipped with each project. For any additional installation instructions or more information, visit [www.danver.com](http://www.danver.com) and subscribe to our YouTube channel.

Homeowners are welcome to contact our offices with questions, but must purchase the cabinetry through a design or trade professional, such as a builder, architect or remodeler.
