Use of Dekton with metal cabinets

DEKTON QUICK GUIDE

A product designed by COSENTINO
The purpose of this guide is to provide general guidelines for the use of Dekton with metal cabinets, both fabrication and installation.

1. FABRICATION

Minimum ½” radius on all the corners of a sink

European or straight seam for L-shape countertops

Make seams when there are cut-outs for appliances

The recommended thickness is 2cm
2. INSTALLATION

- Check the level of the entire installation
- Fix the level using the adjustable legs
- Use Sika Tack® to attach the countertop and shim the empty spaces
- All cabinets should be connected by the connecting brackets
3. APPLIANCES

Place the appliances making sure they rest on the countertop and the corresponding metal bars/additional supports of the cabinets align underneath the countertop to provide proper support.
