## **Drawing of Kitchen Layout & Space**

Provide a drawing with accurate measurements of the space available and the relationship to buildings, walls, posts, etc. Please be sure the drawing answers the following questions:

- 1) Will the backs or sides of the cabinets be against a wall (or surrounded by a pony wall) or should they be finished?
- 2) Do any of the appliances need to be in a fixed position? (Example would be a grill needing to be centered under a hood.)
